Applicant Initiated Interview Request Form

Application No.: 10/612,094 First Named Applicant: Isaac Weiser
Examiner: E. Garcia Art Unit: 3679 Status of Application: pending

Tentative Participants:

(1) Examiner Ernesto Garcia (2) Jun Lee (Applicant's Associate Representative)
(3) _____ (4) _____

Proposed Date of Interview: 12 April 2005 Proposed Time: 11:00 (AM/PM)

Type of Interview Requested:

(1) ☐ Telephonic (2) ☒ Personal (3) ☐ Video Conference

Exhibit To Be Shown or Demonstrated: ☐ YES ☒ NO

If yes, provide brief description: _____

Issues To Be Discussed

Issues (Rej., Obj., etc)	Claims/ Fig. #s	Prior Art	Discussed	Agreed	Not Agreed
(1) <u>Rej.</u>	<u>4-7, 10-11</u>	<u>Russell</u>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(2) <u>Rej.</u>	<u>4-9</u>	<u>Jacobs</u>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(3) <u>Rej.</u>	<u>10-11</u>	<u>Zoebelein</u>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(4) _____	_____	_____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/> Continuation Sheet Attached					

Brief Description of Arguments to be Presented:

Claims as amended overcome the prior art references presently of record.

An interview was conducted on the above-identified application on _____.

NOTE: This form should be completed by applicant and submitted to the examiner in advance of the interview (see MPEP § 713.01).

This application will not be delayed from issue because of applicant's failure to submit a written record of this interview. Therefore, applicant is advised to file a statement of the substance of this interview (37 CFR 1.133(b)) as soon as possible.

This collection of information is required by 37 CFR 1.133. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 21 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

Title: PLASTIC CONNECTOR FOR : E. Garcia
CONNECTING PARTS AND
METHOD THEREFOR :

PROPOSED AMENDED CLAIMS
(INFORMAL COMMUNICATION – NOT FOR ENTRY)

This Listing of Claims will replace all prior versions, and listings, of claims
in the subject Patent Application:

PROPOSED Listing of Claims:

1. (Withdrawn) A connecting structure, comprising:
 - a post with a first end, middle portion, and a second end; and
 - a plurality of prongs flexibly connected to said first end, extending away from said post and toward said second end in a generally V-shape configuration and an abutment stop intermediate said middle portion and said second end.

2. (Withdrawn) The connecting structure of Claim 1, wherein said plurality of prongs are configured to extend through an aperture and expand to a width larger than the aperture.

MR653-1393

Serial Number: 10/457,919

3. (Withdrawn) The connecting structure of Claim 2, wherein said second end is adapted to be received by a coil spring that is adjacent to said second end of said post.

4. (Currently amended) A novelty system comprising:

a body having a plurality of apertures;

one or more appendages corresponding to said plurality of apertures ^{for securement} and ~~adapted to be secured~~ to project in ~~displaceably~~ ^(okay) suspended manner from said body, each said appendage including at least one connecting member ~~extending flexibly therefrom~~ ^{flexible};

a connecting structure that secures said one or more appendages to said body comprising:

a post with a plurality of prongs flexibly coupled to a first end of said post and adapted to be inserted through said plurality of apertures and retained therein. [←] ~~said prongs being configured for extending towards~~ ^{said body to terminate at respective termini for engagement therewith}

5. (Currently amended) The novelty of Claim 4, wherein said one or more appendages comprises a wing-like structure.

6. (Currently amended) The novelty of Claim 5, wherein said connecting structure member includes a second end configured to connect to said one or more appendages.

MR653-1393

Serial Number: 10/457,919

7. (Currently amended) The novelty of Claim 6, wherein said one or more appendages comprise an enclosure configured to secure to said second end of said connecting structure member.

8. (Currently amended) The novelty of Claim 7, wherein said connecting structure member is a coil spring.

9. (Currently amended) The novelty of Claim 8, wherein said connecting structure member has a spring constant that allows the appendages to be freely movable with respect to said body responsive to wind actuation ~~under application of relatively low forces.~~

10. (Currently amended) A method of constructing a novelty comprising:
shipping in at least partially unassembled manner ~~, in a package,~~ a novelty which comprises a body with apertures for receiving connecting structures, one or more appendages including at least one connecting member extending flexibly therefrom, and coupling structures configured to adaptively connect said appendages to said body;

~~unpackaging~~ unpacking said novelty; and

MR653-1393

Serial Number: 10/457,919

securing said appendages to project in displaceably suspended manner from said body by operatively connecting said connecting structures with said apertures of said body.

11. (Original) The method of Claim 10, wherein said securing includes inserting said connecting structures into said apertures.

12. (Withdrawn) A method for constructing a connecting connector, comprising:

producing a post with securing prongs;
inserting said post into a first end of a connecting member; and
coupling said post to said connecting member.

13. (Withdrawn) The method of Claim 12, further comprising coupling a second end of said connecting member to an appendage.

14. (Withdrawn) The method of Claim 13, wherein said connecting member is a coil spring.

15. (Withdrawn) The method of Claim 14, wherein said connecting member is generally L-shaped.

MR653-1393

Serial Number: 10/457,919

16. (Withdrawn) The method of Claim 15, wherein said coupling the post comprises heating said post to create a barrier such that said connecting member is not easily removable from said post.

Respectfully submitted,
For: ROSENBERG, KLEIN & LEE
